

CostGard™ Unitary RTU System Kit

Unitary RTU System Kits are easy to specify and applicable to unitary rooftop units up to 30 tons with 3/4" or 1" drain sizes. These kits are designed for most major manufacturers' unitary rooftop units, including Trane, Carrier, York, Lennox, Aaon, Daikin, Rudd, Rheem, and others. Components are UV-inhibited, engineered for performance and easy installation.

The drain seal static pressure limit is negative up to -2.0" w.c. Specifiers can use the RTU manufacturer's model number to specify for units not listed here.

Typical **CostGard™** RTU System Kit Components
